EXPERIENCE

Software Developer Contractor

December 2022 - current

- Conducted client consultations to understand and address their specific needs and objectives effectively.
- Developed customized websites and applications for them, ensuring practical and tailored solutions that surpassed client expectations.

CLIENTS

EasyRepair [website](#)

August 2023 - current

- Implemented email/phone verification APIs for customer accounts, minimizing spam and ensuring close to 100% validity of information.
- Overhauled the existing statistics dashboard, introducing data filters and enabling data comparison across different time periods.

Creative Mindset Productions [website](#)

August 2023 - current

- Independently developed a WordPress leaderboards plugin and corresponding mobile app.
- Developed a robust database structure for handling permissions, roles, and nested sets/hierarchy of groups and organizations.
- Structured Laravel app and API to be maintainable using a SOLID and DRY approach while adhering to best practices.

BabyNamy [website](#)

December 2022 - November 2023

- Transformed a generic crowdfunding application into a specialized platform for expecting parents to crowdsource baby names.
- Seamlessly integrated Stripe APIs, including identity and bank verification, to facilitate secure and efficient donation transactions.
